

2018-2019 Columbus & Franklin County Seasonal Influenza Activity Weekly Summary (Week 12, Mar. 17th, 2019– Mar. 23rd, 2019)

Highlights

- In week 12 of 2019, the majority of individual local flu activity indicator trend values decreased compared to the previous week. As a whole, flu intensity (composite indicator) decreased but continues to be high.
- Geographic spread and local intensity designation (Click [here](#) for definitions) = WIDESPREAD, HIGH
- Local medical facility labs reported 2,536 tests run with 743 (29.3%) positive results for week 12 of 2019.
- The percentage of ED visits for both influenza-like-illness (ILI) and respiratory symptoms decreased compared to last week.
- In week 12 of 2019, trends for all the local over-the-counter medication category sales tracked decreased (decrease in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever sales and throat lozenge sales) compared to last week.
- In the U.S., influenza activity decreased but remains elevated in the United States. Influenza A(H1N1)pdm09, influenza A(H3N2), and influenza B viruses continue to co-circulate. Please [visit the CDC website for specific information](#).

Local Flu Activity Dashboard (All data are preliminary and may change as updated reports are received.)

Reportable Conditions (Cumulative Numbers as of Mar. 28, 2019)	2014	2015	2016	2017	2018	2019 YTD
Pediatric Influenza Associated Death Reported by Year (based on date of death)	0	0	0	0	0	1
Influenza Associated Hospitalizations (IAH) Reported by Admission Year ⁶	875	447	293	846	1,040	707
IAH comparison by Flu Season (October - May or Weeks 35 - 20)	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19*
*Current season (2018-19) is from week 35 through week 12.	486	871	265	619	1,235	732

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks "▲" = Increase (>2%), "▼" = Decrease (>2%), "•" = Stable (-2% to +2%).

³Black line is current years data. Based on data availability, red line is historical average (excluding pandemic year).

⁴Data Source: Medical claims data from athenaHealth® (www.athenahealth.com). Rate of Flu or ILI visits to Ohio (statewide) athenaHealth® network primary care practices/physicians. Claims data are subject to filing and processing time lags. Historical data are updated when they are received.

⁵Franklin County, OH residents only (based on zipcode). NOTE: Excludes one hospital system included in the past due to technical changes affecting visit classification assignment and numbers.

⁶Confirmed cases only. Based on jurisdiction equal to Franklin County or City of Columbus and admission date available in ODRS.

Influenza Morbidity and Influenza-Like Illness (ILI) Reports

In week 12, the preliminary Ohio¹ (statewide) influenza and influenza-like-illness (ILI) visit rate to athenaHealth® providers (28.8 per 1,000 visits) decreased compared to the previous week and is above its baseline average for the week (Figure 1). The week 12 percentage of all Emergency Department (ED) visits categorized as ILI decreased compared to the previous week (Figure 3) and is above its historic baseline for the week.

Nationally, during week 12 of 2019, 3.8% of patient visits reported through ILINet were due to influenza-like illness (ILI). The percentage is above the national baseline of 2.2% for week twelve.

Laboratory Surveillance

During week 12 of 2019, reporting Franklin County sentinel medical facility laboratories tested 2,536 specimens, with 743 (29.3%) positive (Figure 4). The total number of tests done by local reporting labs from week 35 of 2018 through week 12 of 2019 is 50,781 with 8,401 (16.5%) positives (8,131 type A, 268 type B, 0 type A and B, 2 type unknown).

Nationally in week 12 of 2019, clinical laboratories reported 31,045 specimens tested for influenza viruses, 6,876 (26.0%) of which were positive (6,503 type A, 373 type B). Public health laboratories reported testing 1,618 specimens, 923 of which were positive (877 type A – of which 268 were A(H1N1)pdm09, 573 were H3N2, and 36 were not subtyped; 46 type B – of which 6 were Yamagata lineage, 20 were Victoria lineage, and 20 where lineage was not performed). Please visit the CDC website for more information, including cumulative data.

In week 12 of 2019, Ohio clinical labs reported 58,889 specimens tested for influenza this season thus far. Positive results include: (353) A(H1N1)pdm09; (418) A/H3N2; (9,021) Flu A Not Subtyped, and (144) Flu B (through 3/23/2019). In week 12 of 2019, ODH Public Health Lab reported 1,132 positive influenza tests from specimens sent by various submitters this season so far. Positive results include: (561) A(H1N1)pdm09; (568) A/H3N2; (3) Influenza B (through 3/23/2019). Please visit the ODH website for more information.

ED Respiratory Visits

In the 12th week of 2019, the percentage of all ED visits categorized as respiratory decreased compared to the percentage seen the previous week and is above its baseline for the week (Figure 5).

Over-the-Counter (OTC) Medication Sales

In week 12 of 2019, trends for all the local over-the-counter medication category sales tracked decreased (decrease in cough and cold, electrolyte, thermometer, chest rub, pediatric anti-fever, adult anti-fever sales and throat lozenge sales) compared to last week.
